

Welcome

Joined Conferences on CTTU and TBM DiGs

19-23 January 2026  
Melbourne, Australia

Sponsorship

## Sponsorship Packages of Jointed Conferences on CTTU and TBM DiGs 2026

The International Conference on Construction Technology in Tunnelling and Underground (CTTU) was first established in Melbourne in 2020 to advance research and technological innovation in tunnelling and underground infrastructure. CTTU encompasses a broad range of topics, including technology applications, information modelling, advanced sensing, machine learning, and big data analytics in underground construction. It also explores data structuring, automated decision-making, process modelling for construction management, semantic web services for operations, and TBM positioning automation.

Tunnel Boring Machines in Difficult Grounds (TBM DiGs) is a global conference series offering a dedicated platform for the exchange of knowledge on TBM tunnelling in challenging geological conditions. Launched in Singapore in 2015, the series has since been hosted in Istanbul (2016), Wuhan (2017), Golden, USA (2019), and Leoben, Austria (2022). TBM DiGs addresses a wide array of topics, including ground characterisation, case studies, field monitoring, physical and laboratory testing, numerical modelling, ground treatment techniques, TBM design and operation, tunnel support systems, instrumentation, and risk management.

In 2026, these two internationally recognised conferences will come together for the first time in a joint event hosted in Melbourne, under the unifying theme:

### **Innovating Underground: Resilient and Intelligent Solutions for Next-Generation Tunnelling**

This landmark event will provide a specialised forum for discussing cutting-edge developments in TBMs, tunnelling methodologies, geotechnical challenges, digital engineering, and automation technologies. By merging the strengths of both conference series, the event will foster technical exchange, interdisciplinary collaboration, and knowledge sharing among professionals committed to advancing the future of underground infrastructure.

We invite you to partner with us in shaping the future of underground infrastructure. Early confirmation is encouraged as sponsorship opportunities are limited.

To sponsor the conference, please visit: <https://www.monash.edu/engineering/tunnel2026/sponsorship>

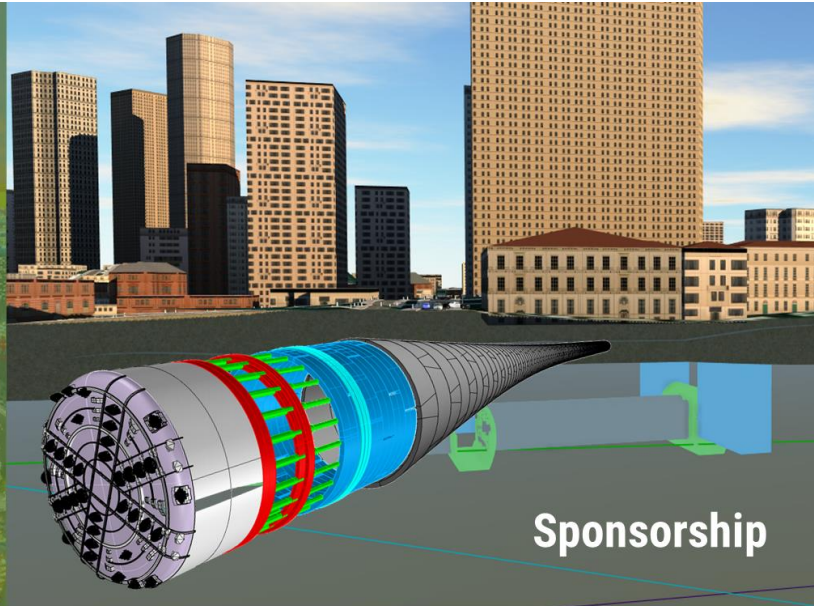

For further information please contact the Secretary via [civeng-tunnel@monash.edu](mailto:civeng-tunnel@monash.edu)
