School of Public Health and Preventive Medicine

# Clinical Data Management

The Clinical Informatics and Data Management Unit has extensive capacity in large scale data management for the conduct of large scale national and international multi-centre clinical trials and registries.

These technologies and capabilities support both clinical and public health information needs.

## Expertise

High quality secure management of data from:

- Clinical registries
- Clinical trials
- Cohort studies
- Health surveys

## Technical Capabilities

Extensive expertise in all aspects of data collection and management including:

- Business Analysis
- Web-based data capture and entry systems
- Web and telephone based randomisation services
- Secure Hosted Solutions
- System Integration
- Data base design

## Data Management

- Form Design
- Data Dictionary
- Data Auditing
- Quality Control
- Receiving, recording and validating data

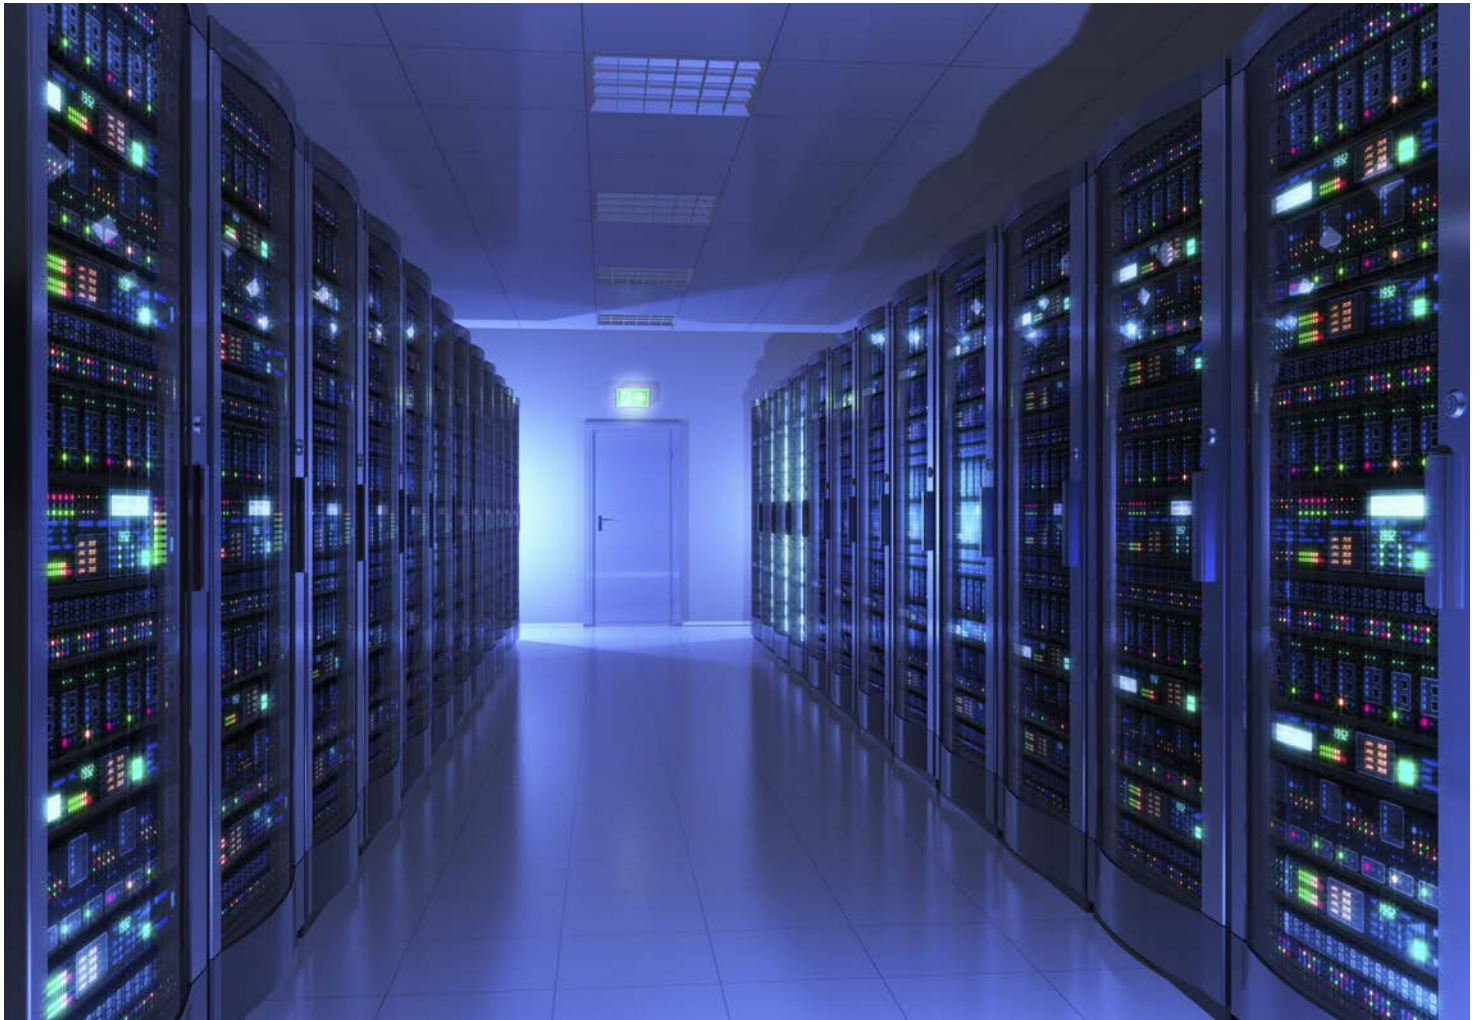

## Strong Research Environment

Extensive access to skills in:

- Epidemiology
- Biostatistics
- Clinical medicine
- Mathematical modelling

## Services

- Microsoft .NET Development team
- Secure Microsoft SQL Databases
- Interactive Voice Response (IVR) System
- Nautilus – Laboratory Information Management (LIMS)
- Optical Character Recognition processing for structured and unstructured paper forms (Teleform)
- Data Auditing and Trial Monitoring
- Document Management and Archiving

**Professor Chris Reid**  
Head, Clinical Informatics and Data  
Management Unit

**Mr David Morrison**  
Systems Development Manager
