MASTER OF ADVANCED HEALTH CARE PRACTICE

MASTER OF ADVANCED RADIATION THERAPY PRACTICE

Deepen your specialist radiation therapy knowledge, advance to a leadership position or embark on a research project with the Master of Advanced Radiation Therapy Practice, one of seven specialisations within the Master of Advanced Care Practice.

With a contemporary and evidence-based curriculum, written by clinical experts, our innovative course will keep you up-to-date with advanced planning, treatment and imaging techniques and help you build translational skills in radiation therapy practice. It provides the tools to shape your future practice and develop new career pathways.

Delivered fully online, the Master of Advanced Radiation Therapy Practice offers the quality and recognition of a Monash graduate degree with the flexibility required by working professionals.

This program also offers a research stream which can be used as a pathway to a PhD.

COURSE STRUCTURE

<table>
<thead>
<tr>
<th>PART A</th>
<th>PART B</th>
</tr>
</thead>
<tbody>
<tr>
<td>Part A focuses on expanding your core skills for advanced health care practice. (24 points)</td>
<td>Part B provides you with the opportunity to pursue advanced specialist study through either coursework or a research focus. (48 points)</td>
</tr>
</tbody>
</table>

All students complete Part B. Depending on your qualifications and experience, you may be eligible to apply for credit of up to 24 credit points towards part or all of Part A. Even if you are eligible for credit, you can elect to do the longer form of the course.

Visit monash.edu/study/course/m6001 to learn more about what you’ll learn within the radiation therapy practice specialisation.

In the Master of Advanced Radiation Therapy Practice you will:
- Advance your clinical judgement and decision-making skills.
- Develop an understanding of local and international perspectives in radiation therapy service delivery and patient care.
- Focus on patient-centred practice and quality management to ensure safe delivery of radiation therapy.

Course code: M6001
Study mode: Online
Intakes:
First semester: February
Durations:
Full-time: 1.5 years
Part-time: 3 years depending on prior qualifications

Challenging yourself and extending your role into areas of advanced radiation therapy practice can be extremely rewarding. Studying the diverse range of units in this specialisation allows practitioners looking to grow personally, professionally and academically to fulfill their career aspirations.

Associate Professor Caroline Wright
Department of Medical Imaging and Radiation Sciences, Monash University
RESEARCH STREAM
PROJECTS

Monash is recognised globally for its research excellence. You can choose to undertake a research project or minor thesis in radiation therapy, where you’ll be matched to a supervisor who is an expert in their field.

Supported research areas include:
- Radiation therapy practice
- Fitness to practice
- Education
- Inter-professional practice

Research works best if it arises from a specific practice-based challenge. Discuss your proposed research project with the course coordinator and we will endeavour to support your project.

ENTRY REQUIREMENTS

For further information about the Master of Advanced Radiation Therapy Practice, including entry requirements, fees and scholarships, visit monash.edu/study/course/m6001

International students are eligible to study in their home country online and must satisfy minimum English language requirements.

WHY CHOOSE MONASH?

- Ranked #45 in the world for Clinical, Preclinical and Health Sciences (Times Higher Education 2019).
- The Faculty takes a bench to bedside approach; our clinical research is focused on directly improving outcomes for patients.
- We participate in Monash Partners Academic Health Science Centre, one of only four advanced research and translational centres in Australia.
