MONASH
SUSTAINABLE
DEVELOPMENT
INSTITUTE

We'll expand your thinking and knowledge. We'll challenge your preconceptions. We'll empower you to lead from where you are and help to address the grand sustainable development challenges of our time — from climate change and social justice, to inequality and overpopulation.

Monash Sustainable Development Institute's Leadership for Sustainable Development specialisation in the Monash Master of Environment and Sustainability is the only one of its kind in Australia.

- Take away practical tools you can use now
- Learn from a truly interdisciplinary curriculum
- Engage in interactive learning
- Be part of a multicultural, multidisciplinary cohort
- Customise your learning with diverse elective options
- Practice your skills in partnership with industry

CHANGE YOURSELF

Our *Leading Change for Sustainable Development* unit will help you understand your potential as a leader. We'll teach you the tools and techniques to lead cross-disciplinary teams and promote change. You'll learn about the different models of leadership and which are suited to dealing with complex problems that have no borders. You'll develop a personal plan you can put into action straight away about where and how you can be most effective as a leader.

CHANGE OTHERS

Our *Understanding Human Behaviour to Influence Change* unit will give you the tools to influence others. You'll learn from leading behaviour change experts how to unpack public policy challenges using a behavioural lens. We'll teach you our very own BehaviourWorks Method. We'll show you how to identify key drivers and use behaviour change techniques to bring about real world results.

CHANGE SYSTEMS

Creating long-lasting and transformative change means combining long-term thinking with short-term action. But to change systems, you first need to understand them. Our *Processes to Influence Change* unit will show you how to analyse current systems and strategically plan social change to achieve sustainable development outcomes.

CHANGE THE WORLD

In our capstone unit, you'll put all your new skills to work. You'll work in an interdisciplinary team with fellow students to identify, analyse and address a 'real-world' complex sustainability challenge. With your team, you'll work on a 12-week project to find solutions to a sustainability governance, policy or management issue identified by one of our exciting partner organisations.

“

Prior to doing the Leading Change unit, I didn't see myself as a leader... but taking the unit has been a really empowering thing. I've seen all the ways that I can apply leadership in my day-to-day life.”

– Remy Shergill, *Monash Climate Change Communication Research Hub*

“

Probably one of the most beneficial things I learned was the [BehaviourWorks Method]. I've used it multiple times now...”

– Daniel Wielechowski, *Tesla*

“

Returning to study and undertaking this Masters has really developed my way of thinking. I'd reached a ceiling in terms of how I thought...Coming back here has challenged that.”

– Duy Dang Le, *Level Crossing Removal Authority*

“

I talked a lot about my experience with the interdisciplinary project at ACF in a recent interview, and I think it was a major reason for me getting the job.”

– Lachlan Butson, *Australian Conservation Foundation*
