

Dr Maggie Kirkman

Global and Women's Health

- ✓ Qualitative research
- ✓ Psychosocial aspects of
 - ✓ Women's health
 - ✓ Ageing
 - ✓ Sexuality & the body
 - ✓ Infertility
 - ✓ Assisted reproduction
 - ✓ Organ transplantation

Through my research I investigate the diverse ways in which women and men understand and manage the vicissitudes of their lives. These could be illnesses, body dissatisfaction, problems with conception, or a sense of exclusion from the mainstream.

My students, colleagues, and I use the results to develop appropriate health and social policy and contribute to improved clinical care.
