Hi !

I'm passionate about education and I'm running for the Academic board as your undergraduate representative!

I'm a second year law student and I've been elected as the 2020 Academic affairs officer with the MSA and I'd like to continue contributing to the Monash Community.

If elected, I'd like to advocate for students in an effective dialogue with university administration. Not just respond to university policy but also actively push forward student views and ideas at the center of university decision making.

Ideas that I would like to push forward:
- More practice exams
- More educational resources for students
- More responsiveness from the teaching faculty

We're all here for an education,
It's important to all of us,
And we should try and get the most out of it.
