Part 3 - Declaration

- 1. I understand that I will have a single injection in one of my arms and will require another booster in 10 years time. The ADT vaccine contains diphtheria toxoid, tetanus toxoid, aluminium phosphate and thiomersal.
- 2. I understand that immunisation with ADT (combined tetanus and diphtheria) vaccine will, in most cases, result in the development of immunity to infection from tetanus and diphtheria both of which are very serious diseases.
- 3. I understand that if I know I have had a severe reaction to tetanus toxoid in the past I should **not** have another injection of tetanus toxoid nor of ADT. I understand that if I am allergic to any of the constituents of ADT, I should **not** have an injection of ADT.
- 4. I understand that I am advised not to have the vaccine if I am pregnant.
- 5. I understand that the risk of any adverse reaction is very low, but there is a possibility of a reaction to the injection and that these reactions may include soreness, tenderness, redness, irritation and a small lump where the injection is given, lasting not more than a few days. In very rare cases, the reaction may be more severe and may require treatment. General reactions are extremely rare.
- 6. I have read and understood the information about the possible reactions to injections with ADT.
- 7. I understand that part 4 of this form will be completed by the clinic which performs the immunisation. Once the course of immunisations has been completed, this form will be forwarded by the immunising clinic to OHS.
- 8. I understand that my Manager/Supervisor may be notified regarding my immunisation status.
- 9. I give my consent to be immunised against ADT.
