Reflecting on another year

As the 12th year of the Bariatric Surgery Registry draws to a close, it is a good time to reflect on what has been achieved and celebrate the year to come.

Thanking Everyone for Supporting the Registry

The Registry's successes for 2024 would not have been possible without the support of the participating hospitals, surgeons and their dedicated teams and bariatric services that contributed as well as our participants.

As such the Registry would like to thank everyone who contributed data in 2024.

Registry Office Closures

The Registry office will be closed between 21st December to 1st January.

A skeleton staff will be available from Thursday, 2nd of January, with regular operations resuming on Monday, 6th January.

We wish you all a happy, joyful and relaxing holiday season. 🥰

2024 Staffing Update

As 2024 comes to a close, it's been an exciting and transformative year for the Registry. One of the key highlights has been the growth of our team, with several new starters joining us since the start of 2024. We would like to extend a warm welcome and express our appreciation to those who have made a significant impact on the Registry and provided valuable contributions.

A special thank you to Roxana Ruiz for her invaluable administrative support for the Registry. During the early months of 2024, when we were short-staffed, Roxana stepped up and played a crucial role in keeping things running smoothly. Her efforts did not go unnoticed, and we are incredibly grateful for her hard work.

Congratulations, Mum-to-be!

Looking ahead to 2025, we are thrilled to celebrate a major milestone in Jen Holland's life as she embarks on the incredible journey of motherhood. Jen is expecting her first child, and we are all excited to share in this special time with her.

While Jen will be on parental leave for 12 months, we are also pleased to welcome Ellie James, who will be taking on Jen's role of Executive Officer at the Registry, in her absence. We are confident that Ellie's expertise and leadership will ensure a smooth transition and the continued success of the Registry during Jen's time away.

A huge Congratulations to our PhD Student!

Alyssa has been awarded her PhD with her thesis titled: Patient Experience, Quality of Life, and Psychosocial Health Following Bariatric Surgery. Through her research, Alyssa has provided the Registry, and greater healthcare industry, with valuable insights into the impact bariatric surgery can have on patients' lives, not only in terms of physical health but also their emotional and psychological well-being.

This is a remarkable achievement that reflects her years of dedication, hard work, and intellectual curiosity. We are so fortunate to have Alyssa working on our team and are certain she is poised to make significant contributions to the fields of healthcare and patient-centred care. Her future endeavours are sure to inspire positive change in the lives of many.

Congratulations once again, Dr Budin.
